

**Q1.** Section 3.0 Service Description, pages 15 and 16.  
Currently, our agency is a contract vendor for an ADHR work support program that provides time- limited, paid transportation to places of employment for JOBS clients. Transportation is a significant barrier to employment for many JOBS clients; however, we do not see transportation services referenced in the RFP as part of the listed activities. Is the list of activities on pages 15 and 16 inclusive or is ADHR receptive to other work-related services, such as transportation assistance, being proposed as part of this RFP?

**R1.** The listing of services in the RFP is not all inclusive. The Department encourages vendors to be creative and include any other work-related services they believe will help clients gain and retain employment.

**Q2.** If a transportation assistance project was proposed as part of a larger project that included services listed as activities in the RFP, would the transportation assistance portion of the proposal jeopardize the entire project or would ADHR consider funding the portion(s) of the proposed project that most closely met its identified needs?

**R2.** The inclusion of transportation or other work-related services in the proposal will not jeopardize the entire project. The Department reserves the right to fund only a portion of the proposed project, if the overall cost is prohibitive.
